

LECO CORPORATION

3000 Lakeview Avenue St. Joseph, MI 49085-2396 U.S.A.
Phone: (616) 983-5531 • Telex: 211605 • Facsimile: (616) 983-3850

SUBJECT: OBSOLETE LECO EQUIPMENT

The following list of LECO instruments will be obsoleted January 1, 1996. LECO will continue to service these instruments through January 1, 1997, provided that parts are available. LECO will discontinue all field service and in-house repair of these units and their associated sub-components effective January 2, 1997.

ANALYTICAL

AF-500 Ash Fusion Determinator
CL-350 Chlorine Determinator
FP-228 Protein-Nitrogen Determinator
MAC/TGA-400 Proximate Determinator
RMC-100 Rapid Moisture in Carbon

Support of these units after January 1, 1997 will be limited to telephone help only by our LECO St. Joseph, Michigan telephone service staff.

This decision is necessitated by the growing number of parts no longer available to LECO by its suppliers, and the shortage of stock item parts.

All listed instrumentation have been out of production for several years.

LECO Corporation presently manufactures state-of-the-art analytical instrumentation available for replacement of any of the obsoleted systems.

Very truly yours,

Craig Peacock
National Service Director
